SAM Projection 8.2

The ultimate training environment

The latest PuttWare 8.2 update brings exciting new features and enhancements to SAM PuttLab and SAM Projection.

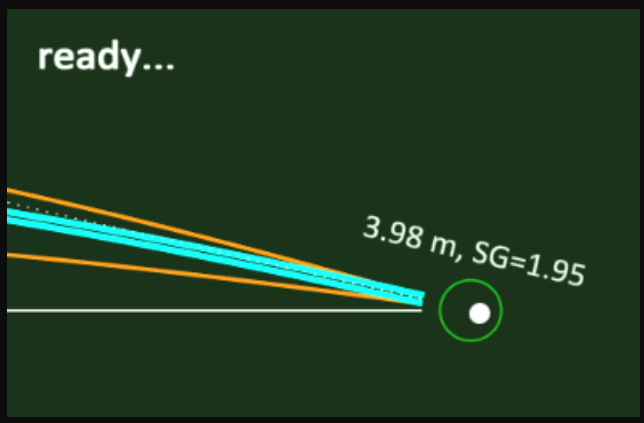
A groundbreaking new Strokes Gained performance score, combined with dedicated Strokes Gained Drills, opens up an entirely new world of versatile, data-driven putting practice.

Science & Motion

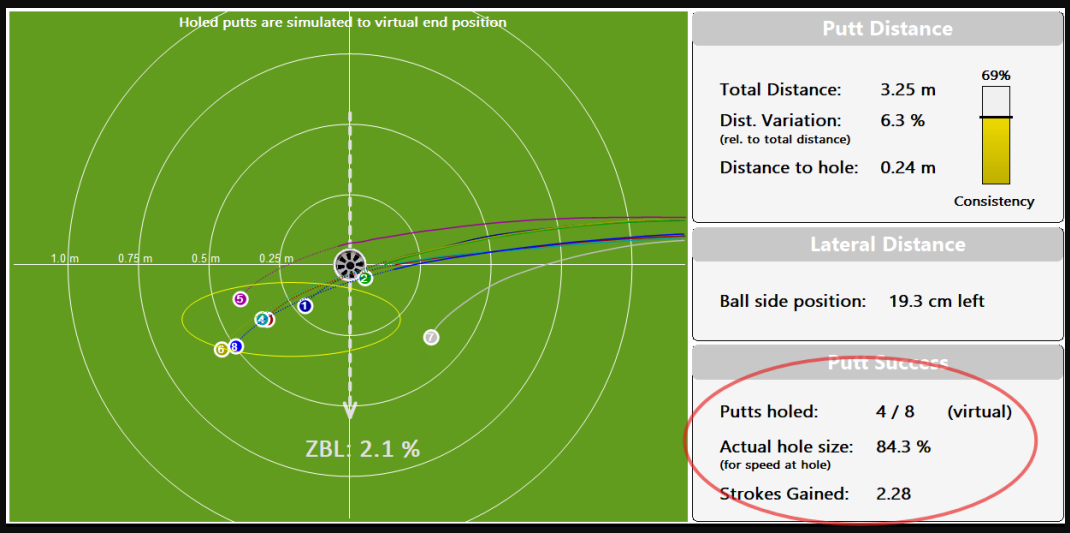
What's New in Projection 8.2?

A unique Strokes Gained Putting Scoring system

SAM PuttWare 8.2 now introduces a unique **Strokes Gained** Putting scoring system. For every putt and every condition, the reference SG number of expected putts is calculated and can be displayed.



Projected StrokesGained reference



StrokesGained in result reports

Your subsequent SG value directly reflects your putting performance, providing an objective and insightful way to evaluate your performance and track your progress over time.

Science & Motion

Measure your Putting. Beat your Score.

StrokesGained Drills - Putting practice with a purpose.

Strokes Gained Scores are a powerful way to measure and improve your putting! With the new Strokes Gained Drills, you'll practice a series of putts on different breaks and distances. For each played putt your Strokes Gained Score is calculated, giving you valuable insight into your putting performance.
Keep beating your high score and improve your putting step by step!

Upgrade to SAM PuttWare 8.2 Today
