SAM PuttStation

The SAM PuttStation is the ideal extension for PuttLab indoor installations - the perfect tool for indoor studios and academies as well as retail golf shops.

Using the SAM FlexTriplet and the SAM PuttStation together allows to set up and change the putter in seconds. Simply clip the triplet on the shaft and both the putter and the triplet will be calibrated automatically.

SAM PuttStation - Features

The biggest advantage to using the PuttStation with the SAM PuttLab is ease of set up and perfect calibration. Use of a laser is only needed for the initial setup making change of putters, triplets etc. extremely simple.

Once the station is set up in the studio environment, calibration is done simply by holding the putter to the extended calibration ruler/ arm and then calibrating the system as usual.

This is very beneficial for putter testing or in case of using SAM PuttLab in a retail / shop environment!

Extendable calibration ruler

Allows you to set up the putter in seconds. Just clip the triplet onto the shaft and align the putter face to the extended ruler / arm.

The PuttStation must be initially adjusted to the aim or target direction by attaching the alignment laser to the ruler / arm (laser is part of the package, see small picture on the left).

Once this is done the station is perfectly square to the target line.

Adjustable station height

The height of the station and calibration ruler above ground can be adjusted - so the station will fit to any putting mat or surface.

Different types of feet allowing you to create the best solution for your specific putting environment (floor).

Advertisement space

Simply to change by attaching a new sticker with your personal or sponsor logo.

LCD mounting arm (optional)

Create a studio environment by adding a flat screen or second screen to your PuttLab. The screen attaches directly to the PuttStation using the optional mounting arm.

With use of a Touchscreen LCD direct operation without keyboard and mouse can be achieved. Works with most screens up to 22".
