

Ideal space requirements for the use of SAM PuttStation indoors

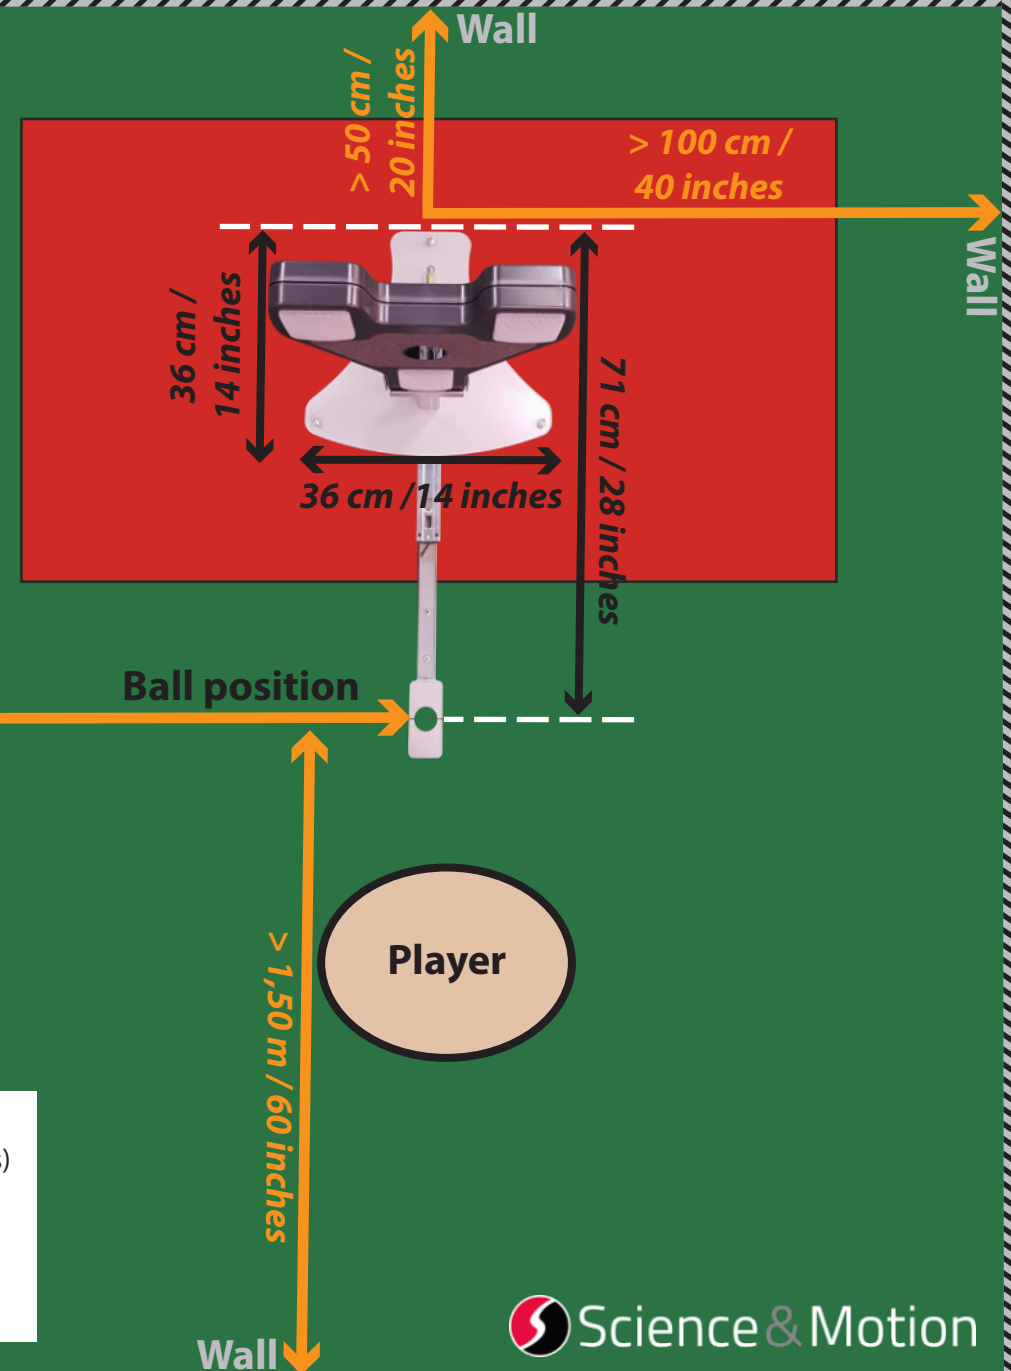

Distances to be maintained

Dimensions of the PuttStation

Check if the area around the BaseUnit (50 cm/20 inches) to the left/right is not occupied by other objects (chairs, boxes, etc.). This can lead to interferences of the ultrasonic signals and reduce the quality of recordings.

The putting mat

Ideal conditions:

- Studio with larger mat (5m/200 inches long, 2.5m/100 inches wide, round corners)
- Studio with green (tips: stimp 9-10; avoid break - check with spirit level; putts not parallel in front of a wall)

Minimum requirements:

- Standard mat (3-5 m/120-200 inches length)
