

SAM PuttStudio – Hole Positions for Green Sizes L+XL

SAM Recommendation:

One or three real holes close to the end of the active area (projection area or putting green/platform).
Additional option if width is $\geq 7\text{ft} / 2\text{m}$: Two more holes with shorter distance on left and right border.

One hole:

The hole needs to be centered for a straight putt from PuttLab start position.

Three holes:

All holes should be lined up with the same distance as the center hole (see picture)

Five holes:

Two additional side holes for shorter putts (only recommended for width of putting area $\geq 7\text{ft} / 2\text{m}$)
